

# YOUR **AGENTIC** COMPANY OS.

European Sovereign intelligence  
for the Industry.

**MADE IN EUROPE SINCE 2014.**

# MANUFACTURING IS MOVING FAST. Your system and data aren't.

## Siloed data. Zero context.

Critical information sits in scattered systems.

Poor visibility. Slower decisions.

## Critical know-how walks out the door.

Decades of expertise lives in people's head, not in systems.

Lost know-how. Relearn.

## Manual processes. High costs.

Too many manual steps slow everything down.

Inefficiency. Higher operating costs.

## Decisions without real-time insights.

By the time you see the problem, it's already expensive.

Risk increase. Opportunities lost.

## Data and IP at risk.

Increasing security threats and compliance demands put your business at risk.

Vulnerabilities. Compliance burden.

## Hard to scale. Hard to change.

Legacy systems and rigid workflows block innovation.

Slower to adapt. Harder to grow.

ValueMiner

The result: **higher costs, slower decisions, and missed opportunities.**

**You don't lack data.  
You lack **operational intelligence.****

# INTRODUCING ATLAS

The sovereign solution for organizations of every size and complexity.

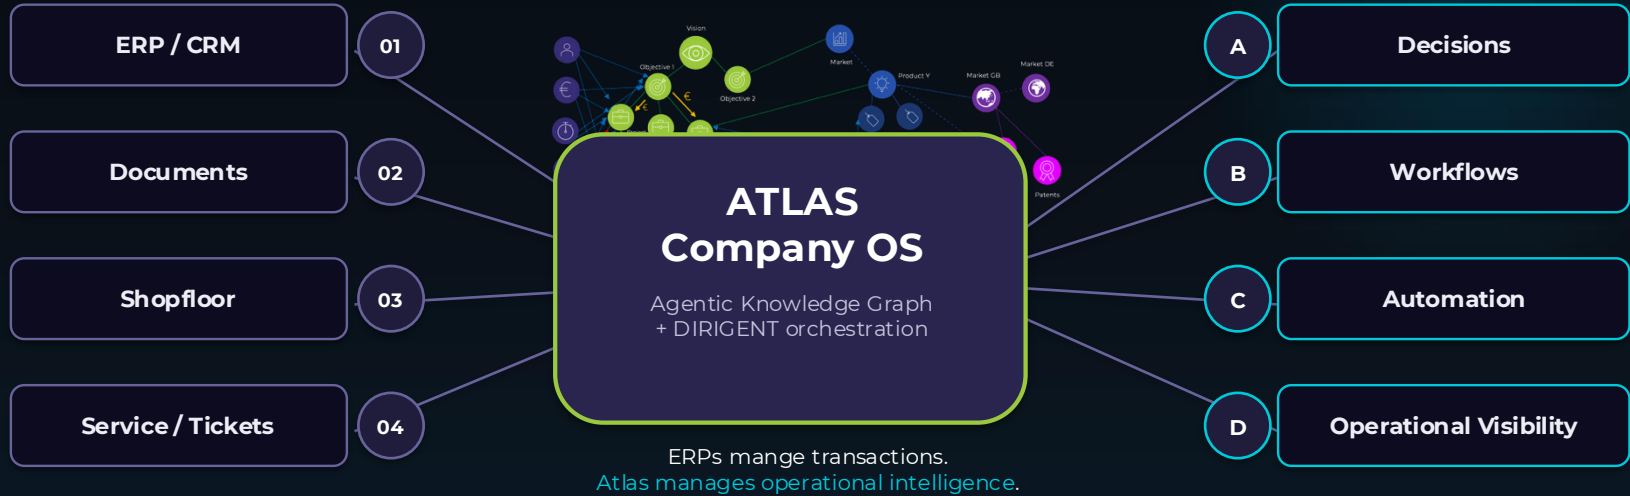

**Atlas turns fragmented knowledge into operational intelligence.**

**Capture. Understand.  
Decide. Execute.**

# THE OPERATING SYSTEM FOR YOUR COMPANY.

The intelligence layer connecting your entire organization.

## Graph-based context

Connects data, systems, knowledge

## Controlled access

Only authorized actions, always.

## Model Agnostic

Use the AI model that fits your needs

## Human-in-charge

Control stays with your

# ATLAS CAPABILITIES IN A NUTSHELL.

## SECURES KNOW-HOW

Atlas captures and critical expertise before it's lost.

**Preserves knowledge.**

## AUTOMATES WORKFLOWS

Automates processes and cuts manual work through governed AI.

**Reduce +60% of manual effort.**

## GIVES YOU TOTAL CONTROL

Atlas keeps your data, rules, roles, and agent actions under your exclusive authority.

**No black-box AI.**

## ACCELERATES DECISIONS

Atlas improves decisions and response speed across strategies and projects.

**Better decisions, faster.**

**One platform. One operational context. Unlimited impact.**

# WITH ATLAS YOU SOLVE REAL BUSINESS PROBLEMS.

## Talk to your data

Query numbers, metrics, and documents. Get reliable, cited and role-context accurate answers.

## See sales, operations, finance

Unify ERP, CRM, shop floor and service channels. Instantly trace performance, metrics and bottlenecks.

## From strategy to execution

Keep key responsibilities and tactical milestones clear and visible to all to turn boardroom decisions into action plans faster.

## Proactive risk control

Map guidelines, workflows, and operations together to spot violations, gaps and escalation before they spread.

## Steer projects by impact

See which projects drive goals, where dependencies block progress and where resources create the biggest effect.

## Make scattered knowledge usable

Know-how from people, emails, documents and systems becomes available for decisions, customer work and handovers.

## Improve processes continuously

Combine finance, sales, customer feedback and operational data with your business processes and trigger automated next-step advice.

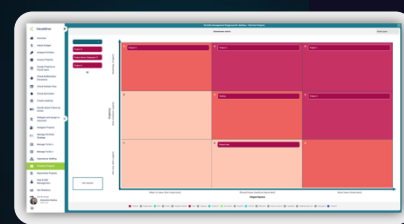

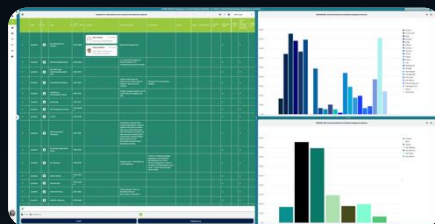

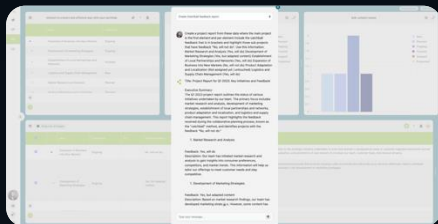

## From Feedback to results faster

Convert employee concepts and suggestions directly into tangible products instead of letting them sitting in silos.

# ONE PLATFORM. ENDLESS USECASES. TAILORED TO ALL NEEDS.

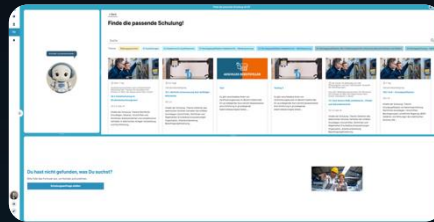

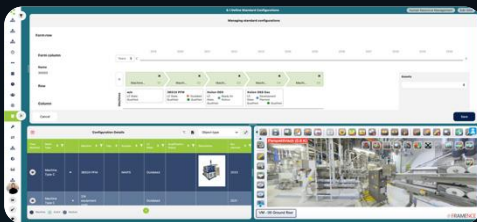

## FOR DECISION MAKING

Relevant information,  
dependencies,  
possibilities, risks.

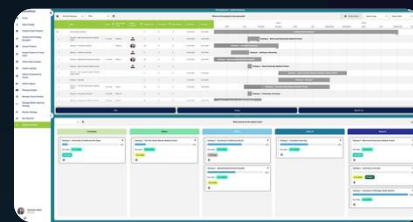

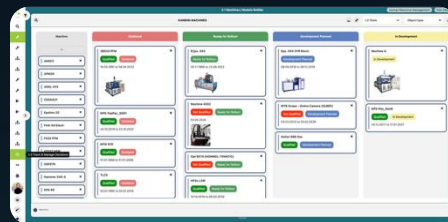

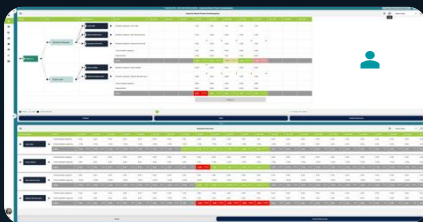

## FOR DECISION EXECUTION

Precision at one glance,  
straight impact on  
workflows, processes,  
projects.

## FOR OPERATIONS AUTOMATION

Centralized, automated  
tracking, maintenance &  
management of physical  
assets.

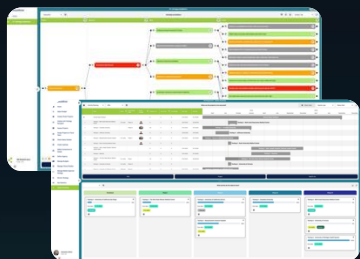

# ONE PLATFORM. ENDLESS POSSIBILITIES.

A snapshot of use cases.

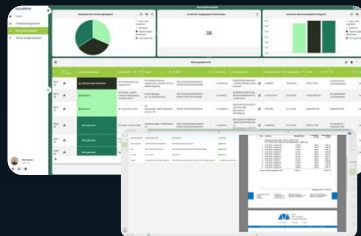

## Industry, Pharma

Strategy Deployment /  
Capacity Management

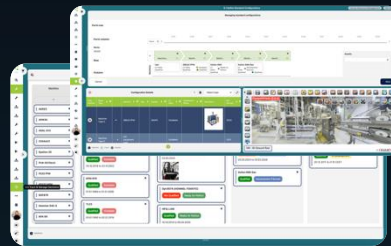

## Admin, Shared Services, Finance

Intelligent Invoice  
Management & Automation

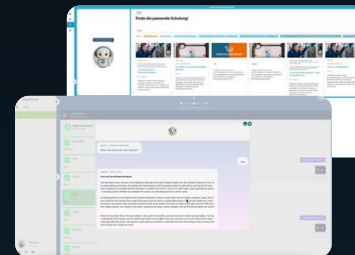

## Manufacturing

Technology Management

## Customer Happiness
